SEEDS

for FARM and GARDEN

Grow Well Because They Are Well Grown

**DISCO SEEDS CAN BE OBTAINED FROM
YOUR LOCAL DEALER**

Our country needs paper and we are curtailing our catalog for that reason. Although we may have deleted a few varieties of vegetable and flower seeds, we have included the most popular and useful. We are glad to say that our stocks are good in regard to germination and purity. Some varieties are very scarce and exceptionally hard to get. Those who order early can expect to get the best selection.

DISCO VEGETABLE SEEDS

Every care has been taken in the selection of the following varieties of vegetable seeds and nothing that is not adapted or hardy has been included. Everything possible has been done to ensure you getting seed true to type and strong germination. Our collections of Vegetable Seeds are excellent value. See front cover.

Disco Flower Seeds

Explanations of abbreviations: (A)—Annuals; (B)—Biennials; (E)—Everlastings; (P)—Perennials; (V)—Vines; (AV)—Annual Vines.

2512	ALYSSUM, SWEET (A)—A low spreading annual with white, scented flowers. Pkt. 5c.
------	---

2521	ANTIRRHINUM, SNAPDRAGON, Dwarf Mixed (A)—Should be in every garden. Pkt. 10c.
------	---

2531	ASTERS, Comet Mixed (Wilt Resistant) (A-B)—All popular shades. Pkt. 10c.
------	--

2559	BALSAM, Double Mixed (A)—Grows 2 feet tall. Pkt. 5c.
------	--

2568	CALENDULA, POT MARIGOLDS, Mixed (A)—Color from cream to orange. Pkt. 5c.
------	--

2590	CARNATION, Chaubaud's Mixed (P)—Grown for cut flowers. Pkt. 10c.
------	--

2633	CENTAUREA CYANUS, Double Cornflower (A)—Known as Ragged Sailor. Pkt. 5c.
------	--

2624	COSMOS, Giant Single Mixed (A)—Blooms from midsummer to frost. Pkt. 5c.
------	---

2577	CALLIOPSIS, Tall Mixed (A)—Fine daisy-like flowers, fine for cutting. Pkt. 5c.
------	--

2685	ESCHSCHOLTZIA, California Poppy (A)—Yellow and gold. Pkt. 5c.
------	---

2821	FOUR O'CLOCKS, Marvel of Peru (A)—Blooms in late afternoon. Pkt. 10c.
------	---

2745	GOURDS, Ornamental, Mixed (AV)—Vine bears odd shaped colored fruit. Pkt. 5c.
------	--

2738	HOLLYHOCKS, Double Mixed (P)—Colors white through red. Pkt. 10c.
------	--

2777	LARKSPUR, Double Tall Rocket (A)—Wide range of color, 18 to 20 inches tall. Pkt. 10c.
------	---

2814	MARIGOLD, Double African, Mixed (A)—Blooms from July till frost. Pkt. 10c.
------	--

2816	MARIGOLD, Dwarf French, Mixed (A)—Yellow, orange, red and brown shades. Pkt. 5c.
------	--

2818	MARIGOLD, Dixie Sunshine (A)—Bright yellow. Pkt. 10c.
------	---

2828	MIGNONETTE, Grandiflora, Mixed (A)—Favorite old-fashioned flower. Pkt. 5c.
------	--

2620	MORNING GLORY, Tall Mixed (A-V)—Wide range of colors. Pkt. 5c.
------	--

2621	MORNING GLORY, Heavenly Blue (A-V)—Sky blue blossoms, cream throats. Pkt. 10c.
------	--

2622	MORNING GLORY, Crimson Rambler (A-V)—Ruby red, white throat. Pkt. 10c.
------	--

2861	NASTURTIUM, Double Hybrids, Mixed (A)—Double vivid colors. Pkt. 10c.
------	--

2856	NASTURTIUM, Dwarf Mixed (A)—Flowers yellow to crimson. Pkt. 5c.
------	---

2889	PANSY, Oregon Giants Mixed (A)—One of the best strains of pansies ever introduced. Pkt. 15c.
------	--

2894	PETUNIA, Single Bedding, Mixed (A-B)—Good selection of colors. Pkt. 5c.
------	---

PORTULACA, Moss Rose (A)—Masses of green foliage, bright colored flowers.

2916	Grandiflora—Large single. Pkt. 10c.
------	-------------------------------------

2917	Grandiflora—Double mixed. Pkt. 10c.
------	-------------------------------------

2962	SHASTA DAISY, Alaska (P)—Snow-white daisies. Pkt. 10c.
------	--

2733	STRAWFLOWERS, Mixed (E)—Everlasting, many shades. Pkt. 10c.
------	---

2220	DISCO SWEET PEAS, Spencer or Butterfly Mixture (A)—Choicest blend, many shades. Pkt. 5c; oz. 20c.
------	---

3009	VERBENA, Mammoth Mixed (A)—3 to 4 inches in diameter, many colors. Pkt. 10c.
------	--

3034	ZINNIA, Disco Giant Dahlia Flowered (A)—Beautiful colors. Pkt. 5c.
------	--

3042	ZINNIA, Double Lilliput or Pompon, Mixed Colors (A)—Dwarf variety. Pkt. 10c.
------	--

3040	WILD GARDEN MIXTURE (A)—Pkt. 5c.
------	----------------------------------

DAKOTA IMPROVED SEED COMPANY, Mitchell, South Dakota

Selected Field Seeds

All our field seeds are selected with the greatest care, grown in districts where our long experience has proved to us produce the best. Thoroughly re-cleaned and tested for germination and purity. Free from all noxious weeds.

All field seeds and seed corn are quoted F.O.B. Mitchell subject to market change. Bags free except on Seed Grain and Soy Beans as noted.

OUR BRANDS

DISCO BRAND. Seed to qualify for this brand must represent the cream of the crop, free from noxious weeds and of exceptionally high purity and germination.

EMERALD BRAND. Good quality seed fully equal to much of the so-called number one seed.

LOWER GRADES. We have some lots of lower grade than those offered in this list. If interested ask for special prices and sample, stating quantities required.

DISCO ALFALFA

All our regular Brands of Alfalfas are shipped out in sealed bags, and origins supported by U. S. Verified Origin Certificate. Look for this seal and certificate which insures genuineness. All our Alfalfas are hardy, northern grown.

LADAK—The U. S. Department of Agriculture found the natives of Ladakh, a province of northern India, cultivating this variety at an elevation of 12,000 feet where the rainfall is around 4 inches per year, and blizzards occur at any month of the year.

A few seeds of this were brought back and given to Montana farmers for experimental purposes. They noticed at once that the plants stood the severe winters and did better in hot, dry weather than ordinary alfalfa. When planted on wilt infected soil it stood again as long as other varieties before being killed out. Give this a trial because all experiments show that it is a coming leader.

Standard 100 lbs. \$50.40

GRIMM—Our stocks of this well known variety have been grown under the most exacting conditions, both in regard to drouth and climate. Sow 10 to 15 lbs. per acre.

Emerald or Standard 100 lbs. \$50.40
Disco or Premium 51.40

COSSACK—The dry years experienced in the northwest have demonstrated the unusual drought resistant qualities of Cossack Alfalfa. Sow 10 to 15 lbs. per acre.

Emerald or Standard 100 lbs. \$50.40
Disco or Premium 51.40

DAKOTA 12—A native of the Black Hills district, giving excellent results to many of our customers. Sow 10 to 15 lbs. per acre.

Emerald or Standard 100 lbs. \$50.40
Disco or Premium 51.40

Cossack Alfalfa

DISCO CLOVERS

TALL SWEET CLOVER—This is by far the most popular biennial variety. It stores up a tremendous quantity of reserve food in its deep tap root. Sow 12 to 15 lbs. per acre.

Emerald 100 lbs. \$19.50
Disco 19.75

YELLOW DWARF—This variety is also a biennial, growing a crop the first year; flowers, bears seed and dies at the end of the second year. Stems are finer. Sow 12 to 15 lbs. per acre.

Emerald 100 lbs. \$19.50
Disco 19.75

GRUNDY COUNTY (Dwarf White)—A biennial. It is earlier, grows to a medium height, does not require clipping, matures its seed earlier and more uniform. Sow 10 to 12 lbs. per acre.

Disco, per 100 lbs. Unobtainable

HUBAM—Annual white. Where it is considered desirable to have the crop make its growth, flower, form seed and die in one year, Hubam has advantages. Sow 10 to 12 lbs. per acre.

Disco, per 100 lbs. Unobtainable

ALSIKE or SWEDISH CLOVER—Produces the finest quality of clover hay; unusually hardy, and well adapted for pasture. Thrives best on low lands. Sow 5 to 6 lbs. per acre.

Disco, per 100 lbs. \$42.00

MEDIUM RED CLOVER—Insist on domestic grown seed. Sow 8 to 12 lbs. per acre.

Disco, per 100 lbs. \$45.00

Disco Grass Seed

SLENDER WHEAT GRASS (Agropyrum tenerum). Originally known as Western Rye Grass. The name Slender Wheat Grass has doubtless been applied to it because of the resemblance which the long, slender, smooth heads bear to those of wheat. It is the only grass among the hundreds growing wild on the prairies of the West or Northwest which up to the present time has been found of sufficient value to give it a place among the cultivated grasses.

Slender Wheat Grass is a perennial. Properly speaking, it is a bunch grass closely allied to Crested Wheat Grass in this respect. It is the famous bunch grass of the bunch grass ranges of the Great Plains Region. When growing on the ranges the height is from 12 to 18 inches, but under cultivation it grows to the average height of about 3 feet.

The roots are fibrous and abundant, the long tendrils pushing far downward into the soil. It is the root system of growth that gives the plant the marked ability which it possesses of withstanding drought.

Slender Wheat is one of the hardiest of grasses. None of the cultivated grasses excels it for growing under dry land conditions. Under very dry conditions it will give better yields than Brome Grass.

Suggested rate of seeding: 15 to 20 pounds per acre.

Disco, per 100 lbs. \$15.00

BROME GRASS—Grows to an average height of 30 inches. The leaf growth very abundant. Can endure extreme cold. Sow 20 to 25 lbs. per acre early in spring or late in fall.

Canadian No. 1 100 lbs. \$19.00

BUFFALO GRASS—Excellent for reseeding land that should be taken out of cultivation and put back into grass. Ask for prices.

CRESTED WHEAT GRASS—Sow Crested Wheat Grass just as soon as you can get on the land in the spring. If fall seeding is more desirable, sow in September or October or just before freeze up. Never sow Crested Grass deeper than one-half inch. About 15 to 20 pounds per acre is the required amount when seeded with a grain drill which in our opinion is the best method for seeding.

100 lbs. \$18.50
Fairway Strain \$18.50
Standard Strain 18.00

WESTERN WHEAT GRASS—A grass native to the Great Plains region where it will give good results with a small amount of moisture. Very hardy, makes excellent pasture, and hay is relished by stock. Sow 15 to 20 lbs. per acre.

Disco, per 100 lbs. \$22.50

RED TOP, Solid Seed—Grows most luxuriantly on moist, rich soils; very robust; produces strong, thick roots and makes a firm sod; very desirable for pasture purposes. Sow 6 to 8 pounds of solid seed per acre.

Disco 100 lbs. \$17.50

REED CANARY GRASS—A hardy perennial grass suitable for hay or pasture. Boggy or marshy land can be transformed from a liability into an asset by seeding with this Canary Grass. Should be broadcast 5 to 6 pounds per acre, drilled to 3 pounds per acre in 16 to 18 inch rows.

100 lbs. \$34.00
Disco \$34.00

TIMOTHY—Almost too well known to necessitate any description. A hardy perennial, having strong resistance to both cold and drought. Sow 10 to 15 pounds per acre.

100 lbs. \$9.00
Disco \$9.00

DOMESTIC RYE GRASS—Well adapted for quick pastures, meadows and lawns. Can be closely cropped. Will give best results on moderately rich soil. Should be sown at the rate of 25 to 35 pounds per acre.

100 lbs. \$13.50
Disco \$13.50

Sorghums for Fodder

Don't plant any forage crop seed before the soil is thoroughly warmed up.

WACONIA SORGHUM "Genuine Originator's Stock"—

This variety has proven to be the most outstanding sorghum ever grown. Be sure to plant an adequate acreage to take care of your needs. No farm should be without Genuine Waconia Sorghum Cane. Drilled 10 to 12 lbs. per acre.

Sealed Bags, per 100 lbs. \$10.00

ATLAS SORGO—Gives a tremendous yield per acre not only in forage but in grain as well. The grain has approximately 90 per cent of the feeding value of corn. The usual quantity sown per acre is 4 to 5 pounds. Per 100 lbs. \$8.50

NEW LOW PRUSSIC ACID CONTENT EARLY BLACK AMBER No. 39-30-S—Our stock is certified, or grown from certified seed. Drilled 10 to 12 pounds per acre. Certified, per 100 lbs. \$9.00
Affidavit, per 100 lbs. 8.00

EARLY BLACK AMBER—The Amber is the earliest of all the fodder canes. Will stand extremely dry, hot weather. Considered excellent for feeding stock. Sow 40 to 60 pounds broadcast; 10 to 12 pounds drilled per acre.

Southern Grown, per 100 lbs. \$8.00

South Dakota Grown, per 100 lbs. 7.00

HONEY DRIP—A very popular variety in many sections of South Dakota and Iowa, has a higher sugar content than the Amber cane. Drilled 10 to 12 pounds per acre.

Southern Grown, per 100 lbs. \$8.00

South Dakota Grown, per 100 lbs. 7.00

ORANGE SUMAC—This is a true variety of sorghum cane for fodder. It has everything a good sorghum cane should have. Give it a trial, as we thoroughly recommend it. Drilled 10 to 12 pounds per acre.

Southern Grown, per 100 lbs. \$8.50

COES—A combination of grain and forage crop. Will grow between 5 and 5½ feet tall, producing a heavy crop of forage and seed. Matures in about 90 days in an average season. Per 100 lbs. \$6.00

SUDAN GRASS—Don't plant Sudan grass too early. It will not withstand frost. Leave seeding until after corn planting. Sudan is the ideal catch crop for hay. Broadcast 20 to 25 pounds. Drilled, 8 to 12 pounds per acre.

Finest Texas Grown. Per 100 lbs. \$15.00

DISCO MILLETS

HAY MILLETS

DAKOTA KURSK—An excellent hay millet. Tests conducted at various experimental stations have demonstrated beyond dispute the value of this millet. We confidently recommend this variety. Sold out.

GERMAN MILLET—One of the best millets for hay, and should be cut when in full bloom. Sow 25 pounds per acre. Per 100 lbs. \$7.00

SIBERIAN MILLET—A very fine millet. Unusually early, extremely hardy and withstands drouth. Sow 30 pounds to the acre. Per 100 lbs. \$6.00

BILLION DOLLAR GRASS—Will grow from 6 to 9 feet tall. Stands up remarkably well and yields enormous crops. Sow 20 pounds to the acre. Per 100 lbs. \$6.00

GRAIN MILLETS

CROWN MILLET—A new Canadian variety of grain millet which grows 6 to 8 inches taller than other grain millet. In Manitoba trials it has consistently outyielded all other grain millets including Turgai and Proso, it also has a finer stem than the other varieties of grain millets. Well worth a trial. Sow the same amounts as Proso Millet. Sold out.

HOG or WHITE PROSO—Grows from 18 inches to 36 inches. For hay purposes use from 30 to 40 pounds, and for seed from 8 to 12 pounds per acre. Per 100 lbs. \$4.00

DISCO EARLY FORTUNE RED PROSO—Is the same type as White Proso except that the color of the seed is red. Sow the same amounts as Proso Millet. Per 100 lbs. \$4.00

Dwarf Essex Rape

DWARF ESSEX RAPE—It is considered a valuable feed crop for young stock, as rape contains the necessary elements which will give them proper growth. Sow from April to August, 4 to 5 pounds per acre.

Disco, per 10 lbs., \$2.30; 25 lbs., \$5.00; 100 lbs., \$17.50

Sorghums for Grain

All our Grain Sorghums are treated with a known and recommended Seed Disinfectant which will control smut.

COLBY MILO—A grain sorghum which has proved itself to be one of the best, not only in heavy yield but also in combating drouth, grasshoppers, and other adverse conditions which the Northwest generally speaking has encountered these past few years. Plant 3 to 4 pounds per acre.
Certified, per 100 lbs.....**Sold out**
Affidavit, per 100 lbs..... **6.00**

MARTIN'S COMBINE MILO—Matures much earlier than the regular Wheatland Milo, maturing within 90 days after planting in a normal growing year. It grows to a height of 3 to 4 feet, has a loose head which facilitates quick drying after maturity and after excessive rains. It will not shatter. It has a large root system, making the plant stand drought well, and also stand well for combining. After the grain is combined the stalk contains an adequate amount of leaves making excellent feed. Plant 3 to 5 pounds per acre. Per 100 lbs.....**\$6.00**

SOONER MILO—This variety of grain sorghum has given good results in various sections due to its ability to withstand drouth. Is taller growing than Colby. Plant 3 to 4 pounds per acre.
Affidavit, per 100 lbs.....**\$6.00**

EARLY KALO—A variety of grain sorghum which was introduced at the Ft. Hays Experiment Station, Hays, Kansas. It proved to be one of the best grain sorghums raised in this section last year.
Per 100 lbs.....**\$6.00**

FETERITA—One of the outstanding grain sorghums. Early and very drouth resistant, grows 5 to 6 feet tall and has abundance of leaves which make excellent fodder. The grain is ideal for all livestock. Drill 4 to 5 pounds to the acre. Per 100 lbs.....**\$6.00**

Disco Open Pollinated SEED CORN

YELLOW DENTS

DISCO SPECIAL—South Dakota's best known variety. The best ninety-day yellow dent on the market. Has a very leafy growth and attains a height of from 7 to 8 feet. Per bushel.....**\$3.50**

MINNESOTA 13—Introduced by the Minnesota Agricultural College. Average ear usually 7 to 9 inches long, maturing in 90 days. Per bushel.....**\$3.50**

GOLDEN JEWEL—Adapted to South Dakota and Iowa, producing a compact ear, 8 to 9 inches long. Will mature in 95 to 100 days. Per bushel.....**\$3.50**

EARLY MURDOCK—Matures in 95 to 100 days. Stalks medium in height. Ears from 7 to 8 inches, having 16 to 20 rows. We recommend it for southern South Dakota, southern Minnesota, and northern Iowa. Per bushel**\$3.50**

FULTON YELLOW DENT—Ninety-day corn selected and named at Fulton, South Dakota. Used by many of our customers around Mitchell. Per bushel.....**\$3.50**

SILVER KING WHITE DENT—A very early White Dent corn that will mature in 90 to 95 days under normal conditions. Ears 8 to 9 inches long with 16 rows of deep grain kernels. Per bushel.....**\$3.50**

NORTHWESTERN RED DENT—Red in color with a white cap. Will mature in 80 to 90 days and is excellent corn for hogging off. Per bushel.....**\$4.00**

EARLY CALICO—Earlier than most large dent varieties. A heavy yielder of both corn and fodder. Usually will do well on poor type soil where other corns fail. Per bushel**Sold out**

FLINT VARIETIES

Specially suited for late planting. Show great resistance to grasshoppers.

RAINBOW FLINT CORN—Specially suited for late planting and will give a good yield. It is excellent for hogging off. Per bushel.....**\$4.00**

DISCO YELLOW HYBRIDS

DISCO 95-W—Relative 95 Days. Small, early maturing variety suitable for entire state of South Dakota. Has shown great promise in northern counties and highly recommended for that section.

Per Bu.
Edge Drop**\$8.75**
Hill Drop **7.00**

DISCO 100-W—Relative 100 Days. An early maturing corn which shows a deep kernel, and a nice, uniform ear. Very similar to the Early Murdock type. This is an outstanding Hybrid and can be used satisfactorily in all of South Dakota.

Per Bu.
Edge Drop**\$8.75**
Hill Drop **7.00**

DISCO 105-W—Relative 105 Days. Maturity will be satisfactory in all corn producing areas in South Dakota. Ears well-shaped of approximately eight inches. Small cob and good sheller. Be sure and use this if you want a good, early corn. We have many satisfied users.

Per Bu.
Edge Drop**\$8.00**
Hill Drop **6.75**

DISCO 110-W—Relative 110 Days. Used quite extensively in Hanson and Davison Counties and in the tiers of counties south and east. Grown by our very best hybrid corn raisers. Deep kernels and not flinty. Highly recommended as an all around corn for yielding ability and feeding quality.

Per Bu.
Edge Drop**\$7.75**
Hill Drop **6.50**

DISCO 110-A—Relative 110 Days. An old standby, the most popular hybrid grown in the United States. Noted for its high yielding ability; resistant to cold, wet soil, can be planted earlier than most hybrids; an ideal feeding corn. Ears medium length and good quality. Adapted to central and southern South Dakota and northern Iowa.

Per Bu.
Edge Drop**\$7.75**
Hill Drop **6.00**

DISCO 111—Relative 105 Days. An excellent new Hybrid closely related to our 111-A. Has all the same inbreds except one which makes it a high yielder and five days earlier. Has exceptionally strong yielding and standing ability. Will not drop ears. Try a few bushels and convince yourself.

Per Bu.
Edge Drop**\$7.75**
Hill Drop **6.00**

Disco White Hybrid

DISCO 106—Relative 105 Days. White Hybrid, one of the earliest double crosses in commercial production. For four years has yielded an average of ten bushels per acre more than the open pollinated strains. Adapted to central and southern South Dakota, Minnesota, and northern Iowa. With the present demand for white corn, better try a field of this. Disco 106 exceeded our expectations this last season.

Per Bu.
Edge Drop**\$9.00**
Hill Drop **7.00**

Jacques Proven Northern Grown Hybrid Seed Corn

William H. Jacques of Prescott, Wisconsin, has been in the seed corn business since 1908, and he was one of the first to introduce Hybrid Corn. We have been distributing Jacques Proven Hybrid Corn for years. Last year the demand was so heavy we were sold out before our catalog was issued. This year we have a small surplus of the varieties noted below. Jacques Proven Hybrid has a deep root system, strong stalk, ears well set on stalk thus eliminating ears dropping off. High yielding and good feed value.

Wm. Jacques Strain 1205 J was the highest yielder in all districts of Section A in 1942 in South Dakota State Yield Test in competition with 39 other well known Hybrids. Section A includes Hanson, McCook, Minnehaha, Hutchinson, Turner, Lincoln, Bon Homme, Yankton, Clay and Union Counties, South Dakota. Try a bushel of this strain.

DISCO SOY BEANS

2 Bushel Bags 25c Extra.

"DISCO" SOY BEANS—It has been proved the last few years that Soy Beans can be grown successfully anywhere that corn is grown and is an excellent substitute.

RICHLAND—Distributed by the Purdue Agricultural Experiment Station. Outstanding characteristics are high yield, early maturity and good resistance to lodging. Well worth a trial.

100 lbs.
Disco.....**Ask for price**

MANCHU—Plants stout, erect, bushy, 38 inches high, maturing in about 105 days, taking 55 to 65 days to bloom.

100 lbs.
Disco.....**Ask for price**

DISCO MUKDEN—Plants stout, erect, bushy, 36 inches high, maturing in about 100 days; flowers, white and purple, taking 50 to 60 days to bloom. Yield about the same as Manchu.

Disco Improved SEED GRAINS

3 Bushel Bags 25c Extra

VICLAND OATS—Vicland is a short strawed yellow oat. Some outstanding characteristics which partly account for its remarkable yielding ability are: A high degree of resistance to rusts and smuts—early maturity whereby it usually ripens ahead of hot dry weather. High weight per bushel. Reports from trials in other states are very favorable, showing that Vicland has a wide range of adaptation where early oats are grown. Per bushel **\$1.75**

Disco Lawn Grass

DISCO EVERGREEN MIXTURE—Long experience in the preparation of Lawn Mixtures has resulted in this now famous blend. Disco Evergreen represents the very finest scientific combinations of dwarf and close growing grasses, producing a soft, velvety turf in remarkably short time. Made up entirely from our own exclusive formula, blended in proportions we know for our rigorous climatic conditions. Sow at the rate of 1 pound per 250 square feet. 1 lb., postpaid.....**45c**

WHITE DUTCH CLOVER—A dwarf-growing clover. Very valuable for lawn purposes. Requires little care and maintains its dark green color with very little watering. Your White Dutch must be pure—cheap, impure seed will spoil your lawn. 1 lb., postpaid.....**90c**

KENTUCKY BLUE GRASS—Also known as "June Grass." Produces an excellent pasture of beautiful verdant green, and is particularly adapted for seeding on a pasture field surrounding the home, where a good sod is desirable. Sow from 30 to 40 pounds per acre. Per lb., postpaid.....**45c**

CURRENT PRICE LIST

FOR EARLY ORDERS

All prices are quoted subject to being sold out and market change. Write for special prices on large quantities. We recommend early ordering. If no agent at your station, add sufficient to prepay freight or express. If you remit too much, surplus will be promptly refunded. If required by parcel post, your Postmaster will tell you in what zone from Mitchell you are located so that you may include correct postage with your remittance.

Should prices have changed when your order is received, if lower, we will refund balance, if higher, we will either reduce your order to the amount remitted, or ship C.O.D. for the balance, as you prefer.

If he cannot supply, write us.

The Dakota Improved Seed Company gives no warranty, express or implied, as to the productiveness of any seeds or bulbs it sells and will not be in any way responsible for the crop. Our liability, in all instances, is limited to the purchase price of the seed.

IMPORTANT—South Dakota customers please add 2 per cent Sales Tax

A GOOD NAME WELL KNOWN

For 37 years has signified the best in seeds.
Grow Well Because They Are Well Grown

To insure prompt attention address the firm, not individuals.

Prices are effective February 2nd, 1944. Due to weather conditions and also lack of labor in many seed producing sections, there will be a shortage of many varieties of seed this spring. We advise early ordering and when possible give second or third choice in case your first choice is sold out.
